

FREYR SOLUTIONS

Publishing & submission

Prepared for Helix Biologics

1,400+

submissions a year

120

countries covered

24h

typical publishing turnaround

Where Helix said the bottleneck is

- Not the writing. The publishing step, every time.
- Validation errors are found late, after the science is settled.
- Each region is re-published by hand from the same source.

What we would start with

- Take publishing for one regional filing end to end.
- Validate continuously rather than at the gate.
- Hand back a dossier that is submission-ready, not review-ready.

How an engagement runs

STAGE	WHO	TYPICAL LENGTH
Source intake and gap check	Freyr publishing	1 week
Build and validate	Freyr publishing	2–3 weeks
Client review	Helix RA	1 week
Submit and archive	Freyr	2 days
